Seminar & Discussion: Health Literacy & Policy

Melbourne – March 2012

Rima E. Rudd, Sc.D., MSPH
Harvard School of Public Health
With Appreciation

Australia-Harvard Fellowship
The Harvard Club of Australia Foundation: Support for collaborative scientific research

Partners and Colleagues:
Maureen Johnson - Melbourne
Robert Adams - Adelaide
Karen Luxford - Sydney

Members of the Kulin Nations, whose land I visit
Literacy

Core components
- Reading
- Writing
- Speaking
- Listening
- Calculating [math, math concepts]

Development
- Schooling
  - K-4 Learn to read
  - 4-> Read to learn
  - The non-formal lessons
- Work

Dr. Rima E. Rudd - March 2012
Literacy influences one’s ability to access information and to navigate the highly literate environments of modern society.
Literacy, Power, & Social Justice

**Literacy**
- Socially determined
- A social determinant

**Social Meaning**
- Identity
- Dignity
- Inclusion & participation
  - Civic
  - Economic
  - Cultural
  - Intellectual
International Assessments

Dr. Rima E. Rudd - March 2012
Findings

Significant numbers of adults in most industrialized nations have low-level literacy skills that constrain their participation in the economy and in society.

**International Findings:** Adult Literacy & Lifeskills Survey 2003
Australian Adults

A majority of Australian adults have difficulty using commonly available materials to accomplish everyday tasks

- Use a bus schedule
- Calculate a discount
- Determine correct dosage for a medicine
- Determine the point of view in an editorial
Australian Adults

- 53% [7 million] have low/limited literacy skills
- 36% [5.4 million] have sufficient literacy skills for participation in today’s labor market
- 18% [2.7] have proficient literacy skills
Example: Limited Literacy Skills

- What does it mean?
  - If you struggle with the material, you may tire and feel frustrated
  - If you are under pressure, you may take short cuts [and make errors]
  - If you focus on the word, you may miss the meaning in the sentence

For example,
A Brief Experience

Please follow the directions [quickly please]:

A balanced eating plan and regular physical activity are the building blocks of good health. Poor eating habits and physical inactivity may lead to overweight and related health problems. By eating right and being active, you may reach or maintain a healthy weight. You may also improve your physical health, mental well-being, and set an example for others. Do it for yourself and your family!
Health Literacy
Literacy Skills in the Health Context

- A new field of inquiry
- Starting point
  - Publication and dissemination of findings: Literacy skills of adults
  - Initial Research Question: What are the implications for health?
- Health promotion
- Health protection
- Disease prevention
- Health care & disease management
- System navigation

**Research Studies: Health Outcomes**

**Key Finding:** Patients with limited reading skills have poorer health outcomes

- Less likely to engage in screening & preventive action
- Less likely to have chronic disease under control
- More likely to be hospitalized
- More likely to report poor health
- More likely to die earlier

**Conclusion:** Significant differences in health outcomes based on patients’ reading skills
Rigor

Literacy is linked to health outcomes even controlling for a variety of factors including SES

IOM, 2004
ETS, 2004
AHRQ 2004, 2011
Perspective

Health Care

Public Health

Civil Society

Individuals & Communities
Skills, Abilities, Actions

Dr. Rima E. Rudd - March 2012
Who is the focus of attention? Who carries the burden of change?

- Focus on individuals, patients, communities
- Action:
  - Participate
  - Find
  - Comprehend
  - Evaluate
  - Use
  - Determine

Dr. Rima E. Rudd - March 2012
Interaction

Individual Factors
- Literacy & numeracy skills
- Language skills
- Emotional state
- Health status
- Experience
- Background knowledge

Health Sector Factors
- Communication skills of professionals
- Institutional characteristics
- Procedures & processes
- Materials in use
- Assumptions
Refocus

Health Care

Public Health

Civil Society

Commercial Sector

Demands
Expectations
Processes

Culture:
Roles
Language
Processes
Needed Emphasis: Balancing Act
Four Areas of Concern*

- Health information and education
- Clinical & health communications
- Health literate organizations
- Partnerships and engagement

*Maureen Johnson
1. Health Information & Education

Focus on Public / Patients

- Access to information \([accessible information]\]
- Access to care & services
- Educational support & improvements
Action Examples: Access to Information & Education

- **Make decisions**
  - Needs & preferences shape information format & structure
  - Participation in review of materials, messages & tools
  - Participation in development of materials, messages & tools

- **Develop knowledge: participation in research**

- **Make meaning: participation in analysis**
2. Clinical & Health Information

**Focus on Practice**
- Application of tested principles
- Professional training & education
- Testing & licensure
- Continuing education
- Orientation programs

**Focus on Materials & Tools**
- Apply tested principles for development & design
- Rigorous Review:
  - Provide assessment test results & modifications
  - Pilot with intended audience and revise as needed
- Regulations for vendors

Dr. Rima E. Rudd - March 2012
Action Examples

**Practice**
- Deconstruct health activities
- Apply teach back
- Encourage question asking
- Demand time
- Demand accessible/usable tools & materials

**Materials & Tools**
- Professional rigor for materials development [begin with critical texts]
  - Apply documented principles
  - Use assessment tools and document
  - Pilot test and report
  - Regulate processes

Dr. Rima E. Rudd - March 2012
3. Health Literate Organizations

Focus on Health Contexts

- Responsibility for access & comprehension
- Physical environment: remove barriers, enhance dialogue
- Social context: change expectations, norms, language, & rituals
- Identify and assess critical texts
Action Examples

- Call to action:
  - Joint Commission: institutional responsibility
  - AMA: *shame free* environments

- Identify & remove barriers:
  - Examples from US, Spain, Italy
  - Prioritize, focus, evaluate: Instructions, Jump start, Question posing
4. Partnership and Engagement

Focus on Community Relations

- Community dialogue: felt & documented needs, perceptions, perspectives
- Participation on boards and committees
- Excursions into community
- Community tours and feedback
Action Examples

- Partnerships
  - Adult education: curriculum integration
  - Libraries
  - Chemists/Pharmacies
  - Journalism
  - Workforce initiatives
  - Education reform

- Brown bag events
- Talking circles
- Outreach: Family Van
- Welcome & Tour: Harlaam Hospital
Partners in Action

- Identify stakeholders
- Provide opportunities for discussion and analysis
- Develop consensus re: purview, responsibilities, actions
- Develop partnerships
- Generate ideas and projects
Consider Regulations

- Standards for critical texts
  - Processes for all vendors
  - Review boards
- Environmental standards
- Accreditation requirements
- Professional training & licensing requirements
Reminder: Focus on the Mismatch

- Develop strategies to improve access
- Identify and remove system barriers
- Evaluate interventions for ameliorative action
Reminder: Identify and Remove Barriers

- Analyses of dialogue [media and interpersonal]
- Analyses of texts [on paper and on line]
- Analyses of tools [materials and measures]
- Analyses of activities & processes
  - Deconstruction of health activities [Rudd et al 2004]
- Analyses of environments
  - Hospitals and health centers [Rudd & Anderson 2006]
  - Clinical practices [DeWalt et al 2010]
Reminder: Renew Attention to Disparities

- Distribution of literacy skills is linked to social factors [Rudd, Kirsch, Yamamoto, 2004]
- Literacy skills have implications for social justice [Rudd, 2007]
  - Access to information
  - Participation & Agency
    - In prevention and early detection
    - For chronic disease management
    - For informed choice [personal and policy]
Time for Outrage

We must rely on our belief in human rights, the violation of which must provoke our indignation
Time for Outrage

Stephane Hessel
Time for Outrage: Indignez-vous!
New York, NY: Twelve.
2011.
Possible Benefits

- Participation
- Increased agency
- Enhanced access
- Reduced Disparities
- Social Justice
- Equity

Healthy Communities

- Food access & safety
- Safe housing
- Educational resources
- Health promotion & disease prevention
- Environmental health
- Occupational health & safety
US Action Plans: Do any of these apply?

- Health Literacy Action Plan 2003
- Institute of Medicine report 2004
- Joint Commission Whitepaper on Patient Safety and Health Literacy 2007
- National Action Plan 2011
- Plain Language Act
